

Most patients  
are eligible to  
receive

**180**

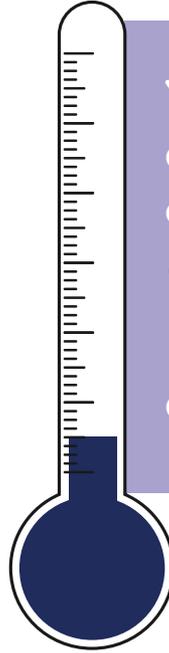

days of care.

Yet, over half  
of patients  
only get

**18**

days of care.

**Where's the zero?** Are you and your family missing out on valuable benefits?

There are many misconceptions about hospice, which can lead to a delay in getting benefits started, but what you may not realize is that you're likely missing out on **MORE** care, at a time when you and your loved ones could really use it.

Many people  
say, “I’m  
not ready to  
talk about  
hospice.”

And then  
realize it’s too  
late to fully  
utilize the  
benefits.

## So let's talk about hospice.

### *“Doesn't hospice mean you'll get less care?”*

Definitely not! When you are navigating life-limiting illness, this is the time when you need **MORE** care and support. The hospice benefit is designed so that you can focus on the people and things that matter most to you.

The Goals of Hospice Care are all about **MORE**

**MORE** quality of life

**MORE** focus on personal goals

**MORE** normal activities

**MORE** support for you and your family

**MORE** physical & emotional support

**MORE** symptom & pain management

**MORE** resources, supplies & equipment

**MORE** counseling & respite services

**MORE** care wherever you call home

### *“Doesn't hospice mean you're giving up?”*

Choosing hospice is not giving up, but is instead a shift in the goals of care toward quality of life and adding **MORE** support.

Choosing hospice sooner means **MORE** time to fully utilize the benefits you deserve.

# We care where you are.

Choose hospice sooner to add benefits wherever you call home for you and those who care for you.

- Physicians
- Nurses
- Aides
- Social Workers
- Chaplains
- Spiritual Counselors
- Volunteers
- Community Resources
