DEFINITIONS

Accidental Injury means accidental bodily damage to an insured resulting from an unforeseen and unexpected traumatic event. This must be the direct result of an accident and not the result of disease or bodily infirmity. **A Covered Accidental Injury** is an accidental injury that occurs while coverage is in force. A **Covered Accident** is an accident that occurs on or after an insured’s effective date while coverage is in force, and that is not specifically excluded by the plan.

A Doctor does not include the insured or an insured's family member. In South Dakota however, a doctor who is an employee's family member may treat the insured if that doctor is the only doctor in the area and acts within the scope of his practice. For the purposes of this definition, family member includes the employee's spouse as well as the following members of the employee's immediate family son, daughter, mother, father, sister, and brother. This includes step-family members and family-members-in-law.
